SPONSORSHIP PACK

EARL 2025 | Enterprise Applications of the R (& Python) Language

EARL BRIGHTON 2025

We're delighted to welcome you back to the seaside in 2025 as we enter Datacove's second year of running the Enterprise Applications of the R (and Python) Languages (EARL) conference alongside the stunning backdrop of the south coast and downs.

EARL BRIGHTON 2025

The EARL conference is organised by Brighton based R, Python and Shiny experts, Datacove, in partnership with Silicon Brighton. Hosted in one of our city's historic seafront hotels over three days, including the much anticipated evening reception on the Wednesday night at a (currently hush hush) iconic south coast venue.

Workshops

Commercial application
use cases

The latest technical and
community developments

A variety of
networking opportunities

WHY SPONSOR EARL?

The Enterprise Applications of the R Language is a premier conference focusing on the commercial usage of the R and Python programming languages.

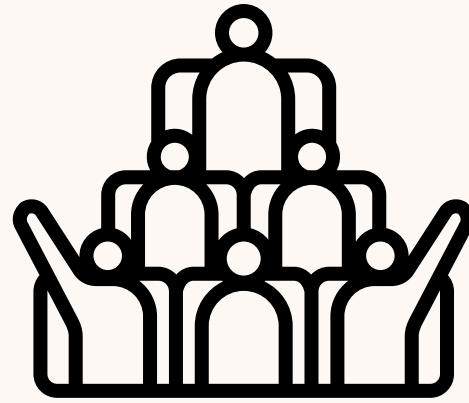

R and Python are two of the most widely used programming languages and are rapidly becoming the lingua franca for business analytics. By sponsoring EARL, you will be placing your company at the heart of the commercial R and Python communities - leveraging powerful analytics across diverse industries.

The adaptability of these open source languages enables organisations of all sizes to derive significant value from their data, without incurring licensing costs.

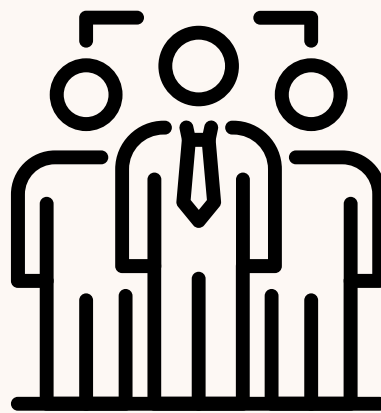

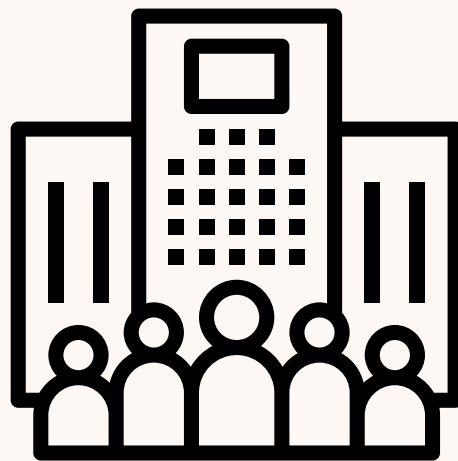

WHY SPONSOR EARL?

200+ Attendees

46% Of delegates have senior roles

56% Of delegates represent companies with 1000+ employees

Be positioned amongst the brightest minds and the biggest businesses known to the R community

Platinum Sponsor 2024:

Ascent

Previous Organisers of EARL

Builders of Cloud-native Services on Azure

Evening Event Sponsors 2024:

Posit

The Owners of R and Shiny

Open-source Data Science Company

Silver Sponsors 2024:

R Consortium

Supporters, Maintainers and Developers of R software

Open-source Governance

2024 KEYNOTE SPEAKERS

Hadley Wickham
Chief Scientist
Posit

Christel Swift
Senior Principal Data Scientist
BBC

WHAT ATTENDEES SAY...

Liz Matthews
Business Owner,
Lorne House

The EARL conference is a unique proposition showcasing ideas, applications and approaches to solving real world problems with open source solutions.

Few such events offer expert presentations and networking from such a cross pollination of business and industries; memorable past talks have included forecasting baggage handling demand at Heathrow Airport, predicting stroke survival rates from social media presence and how Transport for London use data science to reduce station overcrowding.

No one comes away from EARL without a wealth of new ideas, solutions and valuable contacts.

WHAT ATTENDEES SAY...

Amit Kohli
Head of Data Insights,
Access Social Care

The EARL conference has been the highlight of my conference season for several years, having enjoyed them as a speaker and as an attendee. I gathered skills I could apply immediately, created friendships that have lasted the test of time, and created professional links that have helped boost my career. I think my favorite part of EARL conferences though is being surrounded by people that are intimately familiar with the tool, as there are loads of experts that are more than happy to give you pointers based on years of experience. As a leader, I frequently say that the tech itself isn't as important as the people, but every once in a while we REALLY need to talk about the tech!! EARL 2023's absence has been felt dearly and I look forward to new beginnings in 2024.

HEAR FROM THE TEAM...

I feel privileged to say I have been to every single EARL as a delegate but have also had the honour of speaking alongside the elite of R on five separate occasions too.

Over time, the conference has established itself as the premier annual event in the R community calendar and quite simply has become a “can’t miss” opportunity if you want to stay on the pulse of what’s happening within our wonderful and continually growing coding community.

When the opportunity came up to take EARL on as an organiser, it was quite simply a dream come true. A lot of people have called me EARL’s biggest fan and, in my mind, this is the ultimate way to prove that and give more back to the community I love.

Jeremy Horne
